

Listing of the Claims:

1. (Currently Amended) An article for protecting the edges an edge of a piece of furniture having a leg attachable to the piece of furniture by a threaded shank comprising:
a one piece unitary body for mounting over an edge of the piece of furniture;
and

attachment means integrally formed with the body for attaching the article body to a piece of furniture, the attachment means including a tab laterally extending from the body, the tab including an aperture adapted for receiving a threaded shank on a furniture leg, the body fixed to the piece of furniture by fixed mounting of the tab between the leg and the piece of furniture.

2. (Original) The article of claim 1 wherein the body is formed of a lightweight transparent material.

3. (Original) The article of claim 1 wherein the body has a triangular shape formed of a base and two angularly disposed sides extending from the base.

4. (Original) The article of claim 3 further comprising:
apertures formed in the sides for weight and material reduction.

5. (Original) The article of claim 3 wherein the sides are disposable at an angle adapted to be disposed over portion of two adjacent panels of a piece of furniture defining an edge.

6. (Original) The article of claim 3 wherein the sides are disposed at a 90° angle with respect to each other.

7. Cancel

8. (Original) The article of claim 1 wherein the body comprising:
first and second angularly disposed legs, each having a substantially planar shape.

9. (Original) The article of claim 8 further comprising:
apertures formed in the first leg for weight and material reduction.
10. (Original) The article of claim 8 wherein the legs are disposed at an angle to be mounted on a horizontally extending edge of one panel of a piece of furniture.
11. (Original) The article of claim 8 wherein the first and second legs are disposed at a 90° angle.
12. (Currently Amended) The article of claim 8 wherein the attaching attachment means further comprises:
at least one aperture formed in one of the first and second legs for receiving at least one fastener for mounting the body to a piece of furniture.
13. (Currently Amended) An article of furniture comprising:
a front panel;
a back panel;
a side panel;
an interior frame supporting the front panel, the side panel and back panel;
a plurality of legs coupled to the interior frame by a threaded shank;
a one piece unitary edge protector body for mounting over an edge of the article of furniture; and
attachment means integrally formed with the body for attaching the body to the article of furniture, the attachment means including a tab laterally extending from the body, the tab including an aperture adapted for receiving a threaded shank on a furniture leg, the body fixed to the piece of furniture by fixed mounting of the tab between the leg and the piece of furniture.
14. (Original) The article of claim 13 wherein each furniture leg is attached to the interior frame by a threaded shank.
15. (Original) The article of claim 14 wherein the attachment means comprises:

an aperture in the body receiving the threaded shank of one leg to attach the body over an edge on the article of furniture.

16. (Original) The article of claim 15 wherein a vertically extending edge is formed between adjoining ends of the front panel, the side panel and the back panel of the article of furniture.

17. (Original) The article of claim 16 wherein an edge is formed on one of the front panel, the side panel and the back panel.

18. (Original) The article of claim 13 wherein the body has a triangular shape formed of a base and two angularly disposed sides extending from the base.

19. (Original) The article of claim 13 wherein the body comprises: first and second angularly disposed legs, each having a substantially planar shape.
